

Sustainability Policy

Objective

Aker Carbon Capture will contribute to the sustainable development of society through responsible commercial operations and continuous improvement to enable emission free industries and energy solutions through carbon capture.

Commitment

- We base our business activities on the UN Sustainable Development Goals.
- Our contribution to sustainable development of society is to enable efficient, viable solutions for decarbonization.
- We are a responsible employer, adhering to the UN Global Compact principles on environment, labour and human rights, anti-corruption, and sustainable economic development.
- We support our customers to reduce their carbon footprint through offering sustainable solutions, both through sourcing, construction and in operation.
- We are transparent about our work and our sustainability results, and we report on these in the annual report based on the standard of Global Reporting Initiative (GRI).

Behaviour

- Our processes and decisions are based on sustainability – from the Board and management, who have the ultimate responsibility, to each employee who promotes sustainability in their own area.
- We act on a day-to-day basis so that we are creating progress towards the UN Sustainable Development Goals.
- We collaborate to achieve the UN Sustainable Development Goals with our customers, suppliers, the authorities, and partners.
- We provide value-adding solutions to our customers answering their needs and challenges.
