

Environmental Policy

Objective

Aker Carbon Capture shall strive for leading environmental performance in all our operations for the protection of the environment and prevention of pollution.

Commitment

- We shall continuously strive for Zero Harm to the environment through collaboration within our organisation and with contractors and clients.
- We shall conduct our operations with focus on the use of sustainable resources, climate change mitigation and adaptation, and protection of biodiversity and ecosystems.
- We shall identify and monitor environmental risks and opportunities in our activities, deliverables, and operations by always focusing on the environmental aspects.
- We shall conduct our operations through efficient use of materials and energy.
- We shall contribute to the UN's energy and climate related Sustainable Development Goals by developing products and services that maximize decarbonization for our customers with designs that are safe and efficient in consuming energy and natural resources with no undue environmental impacts.
- We shall determine the environmental framework and compliance obligations for our activities and conduct our operations accordingly.
- We shall seek to minimize our environmental impacts throughout the full lifecycle of our products.
- We shall provide the right level of resources for appropriate implementation of this policy.

Behaviour

- We apply a systematic and measurable approach to continually improve environmental performance and correct non-conformities.
- We facilitate for participation, listen to our employees, and cooperate actively with the industry to continuously improve our processes and evolve throughout the value chain.
- We openly communicate environmental issues and performance and share and learn from industry best practices and lessons learned.
- We integrate environmental aspects in all business processes.
